

PADIA: PARENTS' AND PROFESSIONALS' ATTITUDES TO DIETARY INTERVENTIONS IN ASD

THE STUDY:

We would like to find out about parents' and child health professionals' experiences of autism research and their attitudes to the use of the gluten and casein free diet as an intervention in ASD. We are carrying out two web-based surveys; one for parents/carers and the other for child health professionals who support children with ASD and their families. The results of these surveys will help us plan the design of UK research studies into biomedical and complementary and alternative therapies for children with ASD.

PARTICIPANTS:

Parents/carers of preschool or primary school aged children with a diagnosed autism spectrum disorder, and **child health professionals** who support children with ASD and their families, are invited to take part.

WHAT HAPPENS NEXT?

If you are interested in taking part, please visit our website www.ncl.ac.uk/cargo-ne/PADIA.html

When you follow this link, you'll go to a web page that tells you more about the study, and will ask you to enter some details.

We will then send you a letter of invitation with a unique ID number and the link to an information sheet. This information sheet has the link to the web-based survey.
